GREEN RIVER BASIN - WEEKLY ACTIVITY UPDATE

Entek Energy Limited (“Entek” or the “Company”) provides the following update on the Company’s Green River Basin operations.

- ⚙ **Butter Lake 32-10 (32-10)** – Since being shut in whilst the rig moved off location, the well has shown further indications of influx, with increases in wellbore fluid level and well head pressures. The swabbing unit is now onsite and swabbing operations will be initiated in the next 1-2 days. The well has been opened in preparation for swabbing with 5 barrels of oil being recovered.
- ⚙ **Battle Mountain 14-15A (14-15A)** – Analysis and operations will continue this drilling season based on the flow results of Butter Lake 32-10.
- ⚙ **Robidoux 13-15T (13-15T)** – Analysis and operations will continue this drilling season based on the flow results of Butter Lake 32-10.

ENQUIRIES: RUSSELL BRIMAGE - CHIEF EXECUTIVE OFFICER

Competent Person’s Statement:

Information in this report that relates to Hydrocarbon Reserves and or Resources is based on information compiled by Mr Russell Brimage, Chief Executive Officer of Entek Energy Limited who has consented to the inclusion of that information in the form and context in which it appears. Mr Brimage has over 30 years experience in the application of engineering to the petroleum industry in oil and gas exploration and production, both in Australia and internationally, as either an employee or consultant to oil companies operating in the upstream petroleum industry. Mr Brimage directs the Company’s operations with the help of various professional consultants, appropriately qualified and experienced in their respective fields within the upstream petroleum industry. He is also an Associate Member of the Society of Petroleum Engineers.

Note: the weekly activity updates are only related to specific field activities in the GRB and are not an all encompassing review or update of the Company’s other activities including corporate, GoM, or otherwise.
