ENTEK COMMENCES OIL SALES WITH 1,000 BARREL LIFTING

Entek Energy Limited (**Entek** or the **Company**) is pleased to advise that the first tanker load of crude oil has been uplifted from the Entek operated Slater Dome Central Distribution Facility.

Approximately 1,000 barrels of oil has been accumulated from well operations and production. The majority of this oil has come from the Niobrara Formation with the remainder from the shallower Deep Creek reservoir producing in the CF&I well.

CEO and Managing Director Trent Spry stated: "This initial lifting heralds the commencement of oil sales from Entek's extensive acreage within the Green River Basin, where multiple plays are anticipated to contribute to an upward trending production profile as the Company moves forward with its development plans."
