

ASX RELEASE  
19 August 2010

## **GREEN RIVER BASIN - WEEKLY ACTIVITY UPDATE**

Entek Energy Limited (“Entek” or the “Company”) provides the following update on the Company’s Green River Basin operations.

- ❏ Butter Lake 32-10 – The well has reached a depth of 7,050’ TVD. The hole has been logged, cased and cemented as planned. Potential hydrocarbon bearing zones in the drilled section to date will be evaluated based on the wireline logs. Current operation is running in hole to drill ahead into the oil prone Niobrara primary target section.**
- ❏ Battle Mountain 14-15A – Present operation is cleaning an oil-mud emulsion out of the hole so that the test of formation fluids can proceed. The high density and viscosity of the emulsion requires that the well be circulated and swabbed to clean up the hole before testing. After circulating and swabbing the well will be flow tested for a period of around 3 days before being put on production.**
- ❏ Robidoux 13-15T - Operations at Robidoux 13-15T will be conducted after flow testing is complete at the 14-15T well.**

**ENQUIRIES: RUSSELL BRIMAGE - CHIEF EXECUTIVE OFFICER**

### ***Competent Person’s Statement:***

Information in this report that relates to Hydrocarbon Reserves and or Resources is based on information compiled by Mr Russell Brimage, Chief Executive Officer of Entek Energy Limited who has consented to the inclusion of that information in the form and context in which it appears. Mr Brimage has over 30 years experience in the application of engineering to the petroleum industry in oil and gas exploration and production, both in Australia and internationally, as either an employee or consultant to oil companies operating in the upstream petroleum industry. Mr Brimage directs the Company’s operations with the help of various professional consultants, appropriately qualified and experienced in their respective fields within the upstream petroleum industry. He is also an Associate Member of the Society of Petroleum Engineers.

Note: the weekly activity updates are only related to specific field activities in the GRB and are not an all encompassing review or update of the Company’s other activities including corporate, GoM, or otherwise.
