These appointments follow the restructuring of the Board of Directors in the second half of 2008.

The current difficult global financial circumstances have impacted the resources sector, including the exploration for and production of oil and gas. These circumstances create opportunity for those companies with cash flow and cash reserves.

Entek sees the current global pressures on resource pricing and sources of finance as an opportunity to secure quality projects. The Company is now ideally positioned, through its ongoing cash flow from production in the US and Australia and cash reserves, coupled with the diversified experience at Board level and industry experienced executives, to implement the company's expansion objectives in the Gulf of Mexico and other regions in which opportunities are identified.
