

OPERATIONS UPDATE

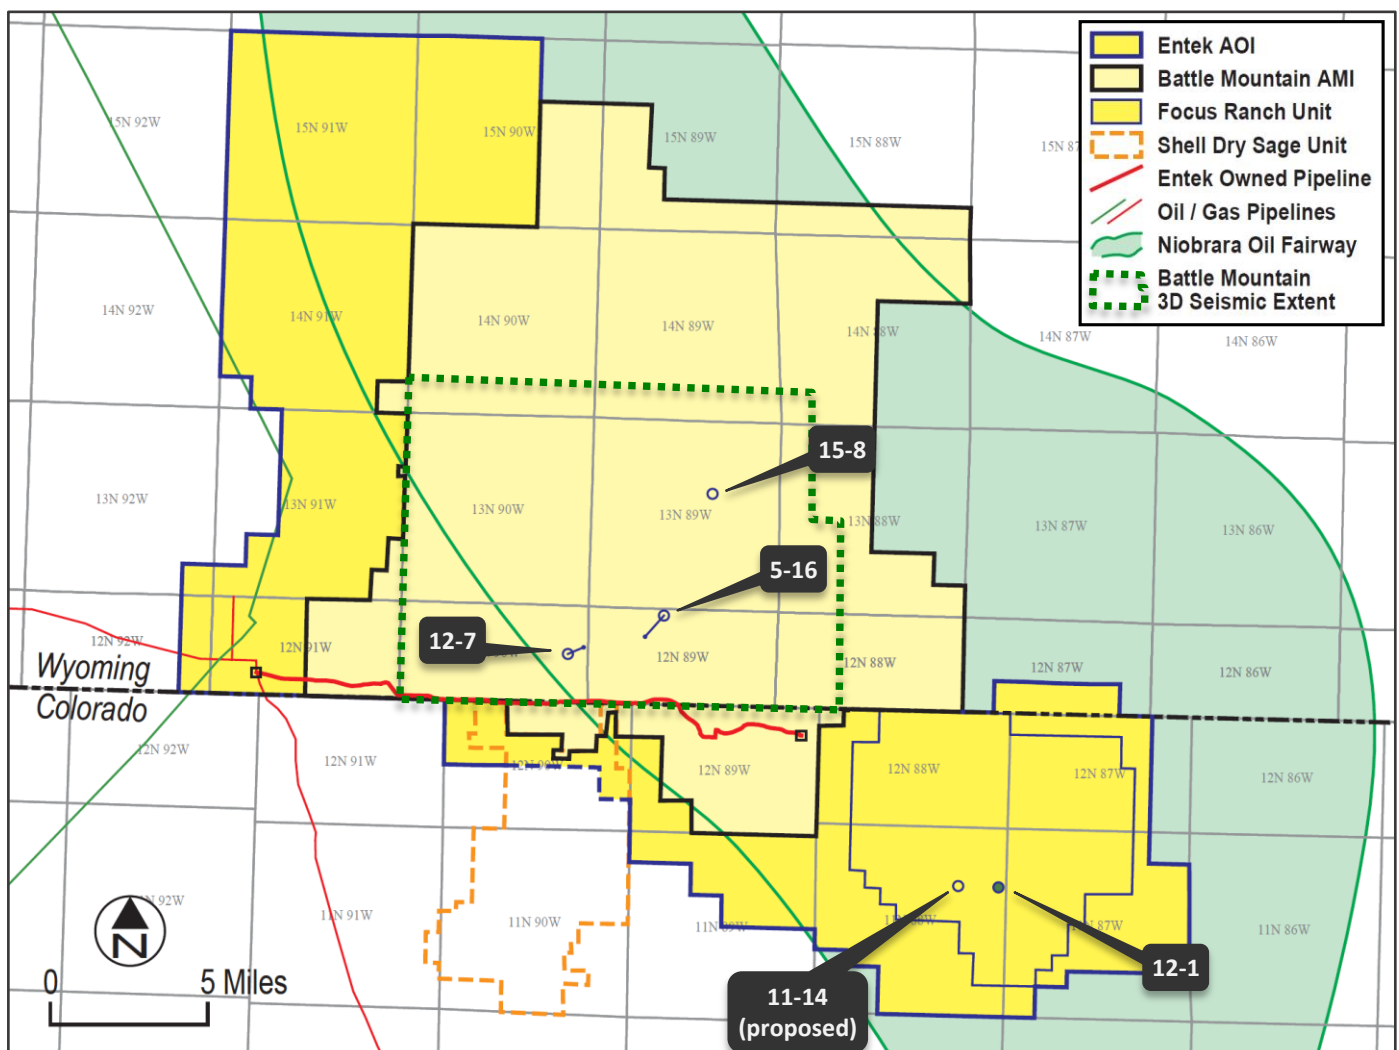

Battle Mountain AMI

Entek is pleased to announce that approval has been granted by the Wyoming Oil and Gas Conservation Commission (WOGCC) for the third well, McKee 5-16-1H (5-16), in which Entek is free carried by GRMR (Operator) in the 2015 drilling program. The other two wells, Cobb 12-7-HA1 (12-7) and State 15-8 (15-8) in which Entek will be free carried have been approved previously as described in the Company Announcement on February 23 2015.

One of these three wells will be the first horizontal well ever drilled on any part of Entek's substantial Niobrara lease position. Another of the wells will be a vertical well to test a clearly defined structural closure with multiple conventional reservoir targets as well as the Niobrara.

Location building has started at the Cobb 12-7-HA1 well location in preparation for the 2015 drilling program which, due to environmental stipulations, as previously alluded, will start in July 2015.

The map below shows the location of the three wells (5-16, 12-7 and 15-8) discussed above within Entek's great land position.
